Criteria for coverage

All the following must be present for coverage eligibility:

As per NCD 90.2, this test is reasonable and necessary when:

1. the patient has either:
 - Recurrent cancer
 - Relapsed cancer
 - Refractory cancer
 - Metastatic cancer
 - Advanced cancer (stages III or IV)
 - AND has not been previously tested by the same test for the same genetic content
 - AND is seeking further treatment
2. The test has satisfactorily completed a TA by MoIDX for the stated indications of the test
3. The assay performed includes at least the minimum genes and genomic positions required for the identification of clinically relevant FDA-approved therapies with a companion diagnostic biomarker as well as other biomarkers known to be necessary for clinical decision making for its intended use that can be reasonably detected by the test. Because these genes and variants will change as the literature and drug indications evolve, they are listed separately in associated documents such as the MoIDX TA forms.

Situations in which Test should not be used or coverage is denied:

The test in question will be non-covered if:

- It does not fulfill all the criteria set forth in the NCD90.2 as stated above
- Another CGP test was performed on the same tumor specimen (specimen obtained on the same date of service)
- A Technical Assessment is not completed satisfactorily by MoIDX for new tests
- For tests that are currently covered but a TA submission has not been made, providers must submit complete TA materials by February 10th, 2020 or coverage will be denied
