## DUSP22-IRF4 Rearrangement

### Alternative Name

IRF4 Rearrangement

### Methodology

FISH

### Test Description

**Probes:** DUSP22-IRF4 gene region at 6p25.3

**Disease(s):** Anaplastic Large Cell Lymphoma (ALCL), large B-cell lymphoma

### Clinical Significance

Gene rearrangements involving the DUSP22-IRF4 gene region have been reported in CD30-positive, ALK-negative anaplastic large cell lymphoma and are associated with a favorable clinical outcome. Rearrangement has been reported in a subset of patients with lymphomatoid papulosis (LyP). Testing may identify large B-cell lymphoma with IRF4 gene rearrangement, also with favorable outcome.

DUSP22 and IRF4 are adjacent genes at 6p25.3; this test does not identify the gene rearrangement partner. MUM1 is the protein expressed by the IRF4 gene. FISH for IRF4 rearrangements has greater specificity for cutaneous ALCL than MUM1 IHC.

### Specimen Requirements

- **Bone Marrow Aspirate:** N/A
- **Peripheral Blood:** N/A
- **Fresh, Unfixed Tissue:** N/A
- **Fluids:** N/A
- **Paraffin Block:** H&E slide (required) plus paraffin block. Circle H&E for tech-only.
- **Cut Slides:** H&E slide (required) plus 2 unstained slides cut at 4 microns. Circle H&E for tech-only.

### Storage & Transportation

Refrigerate specimen. Do not freeze. Use cold pack for transport, making sure cold pack is not in direct contact with specimen.

### CPT Code(s)\*

88374x1 automated or 88377x1 manual

### New York Approved

Yes

### Level of Service

Global, Technical

## Turnaround Time

3-5 days

NeoGenomics Laboratories is a specialized oncology reference laboratory providing the latest technologies, testing partnership opportunities, and interactive education to the oncology and pathology communities. We offer the complete spectrum of diagnostic services in molecular testing, FISH, cytogenetics, flow cytometry, and immunohistochemistry through our nation-wide network of CAP-accredited, CLIA-certified laboratories.

Committed to research as the means to improve patient care, we provide Pharma Services for pharmaceutical companies, in vitro diagnostic manufacturers, and academic scientist-clinicians. We promote joint publications with our client physicians. NeoGenomics welcomes your inquiries for collaborations. Please contact us for more information.
