Specimen Usage

NeoGenomics makes every effort to preserve and not exhaust tissue, but in small and thin specimens, there is a possibility of exhausting the specimen in order to ensure adequate material and reliable results.

Additional Specimen Information

For molecular/NGS tissue testing, the following is requested: A single block for large resections where tumor is abundant, or up to 4 blocks from procedures with smaller specimens (e.g. Core biopsy, cell block). Only blocks from the same procedure and same tumor should be submitted together. Please call the Client Services team with any questions regarding specimen information

CancerTYPE ID® with reflex to pathologist directed NGS cancer profile determined by the CancerTYPE ID result. CancerTYPE ID will be performed, reported, and billed separately by Biotheranostics, Inc. For comprehensive details about CancerTYPE ID including test description, intended use, and limitations, visit CancerTypeID.com.

PanTracer™ Pro, PanTracer™ Tissue, and NeoTYPE® DNA & RNA – Lung or Brain Profiles

If the sample is insufficient to produce either DNA or RNA results, the available results will be reported and alternate CPT® Codes may apply. Please see website for details.

Lung only: To choose a different PD-L1 for NeoTYPE DNA & RNA – Lung, complete the "Other" ordering field at the bottom of the requisition. PD-L1 tests will report separately from the NeoTYPE Profile.
